

Dragonboaters Support Breast Cancer Solutions

You have purchased these pieces of life-saving equipment!

Skin Mesher
\$12,500

A device which stretches pieces of skin graft. By using this device, larger skin grafts can be obtained from small skin pieces.

Laproscope
\$7,500

A diagnostic and surgical procedural tool that is minimally invasive. Tissue samples can be collected for biopsy.

Wireless Sentinel Probe
\$35,000

Surgeons use the probe to identify specific lymph nodes to drain the tumor.

Stereotactic Breast Biopsy Unit
\$265,000

Allows radiologists to accurately sample suspicious growths without invasive surgery.

Digital Mammography Scanner
\$260,000

Allows mammography images to be stored digitally, making them quicker and more convenient than traditional x-rays.

Thank you!
